V08	Collection Efficiency Minimum	96.59 >= 90.00	PASS

9. ITEMS REQUIRING FINANCE TEAM REVIEW

- **aum_cr** [Conflict]: Investigate source discrepancy between bottom-up and reported AUM and reconcile to a single authoritative figure.
- **gnpa_pct** [Conflict]: Validate GNPA calculations in both source systems and correct the inflated reported percentage.
- **nnpa_pct** [Conflict]: Review NNPA data feeds for accuracy and align the reported figure with the bottom-up computation.
- **aum_cr** [Conflict]: Unreconciled variance of 4.58%: financial.aum_cr reports 1310.0 but bottom-up aggregation gives 1250.0. Confirm which figure the lender pack should carry.
- **gnpa_pct** [Conflict]: Unreconciled variance of 68.91%: financial.gnpa_pct reports 1.75 but bottom-up aggregation gives 0.544. Confirm which figure the lender pack should carry.
- **nnpa_pct** [Conflict]: Unreconciled variance of 71.92%: financial.nnpa_pct reports 0.88 but bottom-up aggregation gives 0.2471. Confirm which figure the lender pack should carry.

10. STRATEGIC AI CFO INSIGHTS

- AUM grew to 1,250.0 Cr, registering a 4.8% QoQ increase, underscoring continued portfolio expansion.
- Total debt rose to 705.0 Cr (+13.71% YoY) while the debt-to-equity ratio improved to 2.01x, comfortably below the 4.0x covenant ceiling.
- Asset quality is strong: GNPA fell to 0.54% (down from 1.8% prior) and NNPA is at 0.25%, both well within the 3.0% and internal limits.
- DSCR stands at 1.44x, providing a 0.19x buffer above the 1.25x covenant requirement, indicating solid debt service capacity.
- Capital adequacy is robust at 18.9%, exceeding the 15% regulatory minimum, and ROE of 15.4% surpasses the 14% benchmark.
